# Merchant ID.

Use `375917` in tests. Value for production is provided by Paytrail.

# Merchant Secret.

Use `SAIPPUAKAUPPIAS` in tests. Value for production is provided by Paytrail.

#### Right side logo address.

Example: /modules/ahcocheckoutfipsp/150x400.png. Empty field means disabled.

#### Left side logo address.

Example: /modules/ahcocheckoutfipsp/150x400.png. Empty field means disabled.

# Hide logos in the checkout page.

By default Off. It is recommended to keep it off

# Allow cache when retrieving Payment ways?

By default on. It is recommended to keep it on

# Allow only special payment buttons, such as Apple Pay?

By default Off. It is recommended to keep it off. The module provides only the Apple Pay button, if the visitor uses Safari web browser.

# Refund web form location on order handling page?

Prestashop allows you to display modules in different locations on the order handling page.

#### Module debug status?

By default Off. It is recommended to keep it off.

# Customer email addresses, who can order with Paytrail PSP testing creds

Paytrail Merchant ID **`375917`** and Merchant secret **`SAIPPUAKAUPPIAS**` can be used to test out the Payment module. These customer email addresses automatically get this Payment module to test mode. Email addresses have to be separated by comma. Previous setting <u>Module debug mode</u> has to be active. It is recommended to keep this field empty.

# Order status

Orders status, when successfully paid with Paytrail PSP. Prestashop sets this status to successfully paid order.

Prestashop lists all the payment ways as radio buttons:

"Nordea" payment button is the easiest to test out the Payment Module.

#### Refunding webform

If Prestashop order has been successfully paid via Paytrail payment gateway then order handling page shows refunding information:

Paytrail PSP.									
Paytrail transaction ID:

Paytrail payment module for Prestashop Debugging payment module

After "Reports about payment transactions." section comes the "Debugging" section. This can provide useful information for module developers.

#### Debugging

Cart ID	Paytrall PSP query about Cart
Order ID	Paytrall PSP query about Order

If Module debug status is set on, then more debugging information about the current page can be accessed, when "**&debugAhcocheckoutfipsp=1**" is appended to the browser location field.
